

## TÖNNJES ESTABLISHES LOCAL LICENSE PLATE PRODUCTION IN MANILA

### **Delmenhorst/Manila.**

By setting up a new licence plate production facility, TÖNNJES has fulfilled a key request of the Philippine government. After the state attempted to restructure the production of licence plates in the country in 2013, there were severe supply bottlenecks. The result: many vehicles drove through the streets without proper number plates. For this reason, the Land Transportation Office (LTO) commissioned TÖNNJES three years ago to create a local production and decentralised issuing system to ensure the reliability of vehicle recognition and pave the way for digital applications in terms of mobility. In 2019, TÖNNJES was also awarded the contract to supply a safety number plate and the innovative RAIN RFID sticker for headlights called IDeSTIX Headlamp Tag for motorised two-wheelers in the island nation.

#### About TÖNNJES E.A.S.T. Infrastruktur Invest GmbH

The company TÖNNJES, from Delmenhorst, is a technology supplier and system provider that sells products for all areas of vehicle registration and identification from a single source, from number plate production to the creation of a central registry. With the IDePLATE (RFID tag) and IDeSTIX (RFID windscreen sticker), the company has developed solutions that protect against manipulation, fraud and theft. TÖNNJES distributes its services via equity holdings in 50 locations worldwide and employs around 2,000 people along with its partners.
