

Hydraulic Embossing Press P70

Hydraulic Embossing Press for the production license plates

As a fast working and robust machine, the Press P70 is cost-effective and ideal for the use of male/female embossing dies. The embossing press is an all steel construction with one featuring one generously sized hydraulic cylinder. The drawer of the press is perfectly fitted onto the working table. A low-maintenance two-stage pump and a motor are integrated within the oil-tank.

Advantages

- | | |
|---|---|
| <ul style="list-style-type: none"> ▪ Low noise, vibration-dampened oil-immersed hydraulic unit ▪ Suitable for many aluminium alloys, e.g. EN AW 1200 or EN AW 1050 ▪ Suitable for embossing of aluminium sheets up to 2 mm thickness | <ul style="list-style-type: none"> ▪ Fast working and robust : cycle time approx. 4 seconds ▪ Two-handed safety operation or automatic release with adjustable pressure limit switch ▪ Cost-effective ▪ Suitable for clapperdie and hinged tool solutions |
