

Hydraulic Embossing Press P 70

Hydraulic Embossing Press for the production license plates

As a fast working and robust machine, this Press P 70 is cost-effective and ideal for the use of male/female embossing dies. The Embossing Press is an all steel construction with one large dimensioned hydraulic cylinder. The working table is fitted with a moving lower press plate. A maintenance free two-stage pump and a motor are integrated in the oil-tank.

Advantages:

- Low noise, vibration-dampened oil-immersed hydraulic unit
- Suitable for many alluminium alloys, e.g. EN AW 1200 or EN AW 1050
- Suitable for embossing of aluminium sheets up to 2 mm thickness
- Fast working and robust : cycle time approx. 4 seconds
- Two handed safety operation or automatic release with adjustable pressure limit switch
- Also available in 230V
- Cost-effective

Technical Data

Dimensions (WxDxH) 900 x 900 x 1200 mm

Weight 790 Kg

Pressure Up to 700 kN

Capacity At least 200 license plates per hour

Number of Cylinders 1

Working Stroke Max. 56 mm

Connected Load 50 Cycles - 1,1k W/400 V

Press Surface 600 x 300 mm
