

Hydraulic Embossing Press P50

Hydraulic Embossing Press for the production of license plates

Space saving, reduction in noise and two handed safety operations are the key features of the P50. With a solid welded steel construction including two hydraulic cylinders and a separate hydraulic unit with adjustable limits the P50 allows for the embossing of single and two line plates. Such plates are delivered with a pre-embossed border. The frame for the embossing tools can be moved back and forth on rails. Optionally, we can deliver a cabinet for storing the hydraulic unit below the press. The hydraulic unit is located in the press cabinet.

Advantages:

- Space-saving
- Two handed safety operation
- Adjustable pressure limit
- Also available for 400 V
- Separate hydraulic unit
- Easy transportable table press

Technical Data

Dimensions (LxWxH)	860 x 500 x 650 mm
Weight	138 Kg
Capacity	up to 500 kN
Number of Cylinders	2
Working Stroke	max. 55 mm
Voltage	50 Hz - 1,5 kW/ 230 V
Press Surface	520 x 180 mm
