

Security Plate Shredder High Performance

Fast and secure destruction of license plates

The Security Plate Shredder HP can cut all types of license plates, up to a thickness of 1mm, into small parts. Expired license plates cannot be misused and produced metal scrap is very compact, without sharp edges and easy to handle. The transportation belt ensures a high level of work safety. The HS version is the ideal machine for high volume plate shredding. High speed, robustness and superior German quality are the characteristics of this Plate Shredder.
